THE FIRST MAN .- The New York Tribune of Saturday, gives quite a detailed description of the pre-historic skeleton discovered recently in a cave at Mentone, Italy. This is the oldest human relic ever found, and scientists say that the owner of this fossil frame lived in the paleolithic period, that is from 10,000 to 100,000 years ngo. The most remarkable thing about him is that his skull instead of being like that of an ape or even a Hot tentot, is of the most civilized European type, broad, high forehead, large facial Children Cry—for Pitcher's Cas angle and regular, not prognathous Jaws.
As far as he goes "the man of Menton" is a protest against the Darwinian theory because he seems as much "developed" physically and cranially as the modern
